Passionate technology enthusiast with a focus on GoLang, aiming to transition to a Middle Back-End Developer role within 1-3 years. With 2 years of experience in technology companies, I am committed to continuous skill development and contributing to company growth.

WORK EXPERIENCE

Software Engineer   **Oct 2020 - Mar 2024**
Huu Hong Machinery Join Stock Company   **Ho Chi Minh City, Vietnam**

- Worked as a **Business Analyst** for 6 months (Oct 2020 - Apr 2021), gathering requirements from various stakeholders to ensure alignment with business objectives.
- Gathered and clarified requirements from stakeholders to ensure alignment with business objectives.
- Supported **Customer Service/Sales** by providing cost-effective solutions, technical advice, and analytic studies.
- Provided technical support during meetings and compiled weekly reports for management.
- Have 2+ years of experience in developing **APIs** using the **GOLANG** programming language.
- Built secure and performant **APIs** using **Golang** to integrate with HHM web's, empowering cooperatives to develop billing software and monitor energy usage.
- Owned **API** design from requirements gathering (customers, sales, stakeholders) to implementation.
- Enhanced system performance through **Golang concurrency** and robust debugging skills. Secured **APIs** with **JWT** for access control.
- Acquired knowledge of useful tools such as **OOP, Data Structures, Algorithms, Git, Docker, Agile, Scrum**, and **Jira**.
- Technologies used include **Golang, Gin, JWT, GORM, Redis, Swagger**, and **Oracle Database**.

IT Support - Assistant Manager   **Sep 2019 - Jun 2020**
SÔNG LA TECHNICAL EQUIPMENT CO ., LTD   **Ho Chi Minh City, Vietnam**

- **Increased bid win rate by 80%** with well-prepared bids.
- **Reduced bid preparation time by 60%** with streamlined processes.
- **Secured 100 new customers** through targeted research and sales techniques.
- **Achieved 95% success rate** in contract negotiations.
- **Ensured 100% warranty fulfillment** exceeding customer expectations.
- **Maintained 100% on-time delivery** for EVNCPC and EVNSPC contracts.
- **Increased website traffic by 80%** with engaging content and design.
- **Optimized inventory management** for tenders and contracts.

EDUCATION

Engineer's degree Electrical Engineering Technologies/Technicians   **Sep 2015 - Jun 2019**
Industrial University of Ho Chi Minh City   **GPA:** Good

- **Academic Achievements:**
  - **Merit Scholar:** Awarded a 50% tuition scholarship for the first semester of the fourth academic year (2018-2019), recognizing academic excellence and dedication to studies.
- **Key Skills Gained:**
- Project management and teamwork skills
- Communication and presentation skills

SKILLS

Optimization Techniques: Performance optimization, Memory Optimization, Database Optimization, Code Optimization

Soft Skills: Leadership Skills, Communication Skills, Problem-Solving Skills, Teamwork and Collaboration, Adaptability and Learning Agility, Attention to Detail and Quality Assurance

Software Development Skills: API development, Database Design, System Design, Performance Optimization, Clean Architecture

Tech Stacks: GoLang, Gorm, Gin, Echo, Redis, MySQL, Postgres, JWT, Swagger, SQL-Migrate, Restful API, Clean Architecture, Optimization Techniques

PROJECTS

ORDER APP (INDIVIDUAL PROJECT) ⧉   **May 2024 - Jun 2024**

    Position: Backend Developer | Team size: 1

    Description:

- This mobile application empowers users to conveniently order and purchase fast food. The intuitive interface allows users to browse menus, select items, and place orders with ease.
- Reduced API response times by 20% by refactoring code, optimizing database queries, and implementing load balancing techniques.
- Improved application performance by 15% by employing memory optimization techniques and minimizing resource-intensive operations.

    Key functionalities developed:

- User registration, login, and account management (including password recovery).
- User profile management for updating and deleting personal information.
- Menu management system for viewing, adding, editing, and deleting menu items.
- Order management system with features for adding items to cart, modifying orders, and completing purchases.
- Promotion and discount code functionality (creation and application of offers).
- Admin panel for managing users, menu items, promotions, and viewing feedback.
- Payment gateway integration for secure transaction processing.
- Order history and saved addresses features for user convenience.
- Feedback system for user reviews and experience ratings.
- Middleware implementation for enhanced security and performance.
- JWT authentication for secure user access.
- Database migrations and data persistence management.
- Comprehensive **API** documentation using **Swagger**.
- Thorough testing and quality assurance procedures.
- Ongoing maintenance and support for the application.

    Technologies: Golang, Gin, Gorm, JWT, SQL-Migrate, RESTful API, PostgreSQL

API FOR WEB HHM PLC (COMPANY PROJECTS)   **Jan 2023 - Dec 2023**

    Position: Backend Developer | Team size: 2

- **Developed** robust and maintainable **API** using clean architecture principles, ensuring clear separation of concerns, high testability, and scalability using GIN, GORM, REST API, and JWT for seamless integration with other software systems (Mobile App, Web App for Customer).
- **Optimized** data retrieval for high-volume processing (over 100k orders/day) by implementing efficient caching strategies and database indexing techniques.
- **Implemented** JWT for secure user authentication within the API.
- **Automated** invoice issuance by integrating with electronic invoice software, delivering invoices directly to customer emails upon successful payment.
- **Troubleshooted** and **resolved** critical system bugs within a tight 2-week timeframe, significantly improving overall performance.
- **Conducted** thorough quality checks to ensure code integrity and functionality.
- **Provided** ongoing maintenance and support after successful software deployment.

    Technology Stack: Golang, Gin, GORM, JWT, Redis, Swagger, Oracle Database

API FOR WEB HHM RF AND 3G (COMPANY PROJECTS)   **Apr 2021 - Dec 2022**

    Position: Backend Developer | Team size: 5

- **Building a robust RESTful API** using Golang (Gin framework) for seamless integration with customer-facing applications. (**REST API, Golang, Gin**)
- **Implementing a server-side component** to receive and process high-volume frame data (over 1 million orders/day) from remote metering devices **RF and 3G**. (**Scalability, Message Queues (RabbitMQ/Kafka)**)
- **Designing algorithms for power calculation** based on the extracted data from the frame stream. (**Electrical Engineering Knowledge - Potential Collaboration**)
- **Developing a user management system** with role-based access control (Level 1-4) adhering to EVN regulations for secure user authentication and authorization. (**User Management, JWT, EVN Compliance**)
- **Utilizing GORM for potential database storage** of parsed data for further analysis. (**Database, GORM**)
- **Providing API documentation (Swagger) for smooth integration with the frontend team.** (**API Support, Swagger**)
- **Implementing efficient caching strategies and database indexing** for optimized data retrieval. (**Scalability, Caching, Database Indexing**)
- **Troubleshoot and resolve critical system bugs** to ensure optimal performance. (**Problem-Solving**)
- **Conducting thorough quality checks** to maintain code integrity and functionality. (**Quality Assurance**)
- **Providing ongoing maintenance and support** after deployment. (**Maintenance & Support**)

    Technology Stack: Golang, Gin, GORM, JWT, Redis, Swagger, MSSQL Database
